

December 2022

Artemis Mission

NASA's Artemis programme is an ambitious attempt to land humans back on the Moon and eventually establish a lunar base and Gateway in lunar orbit.

Artemis 1, launched on November 16th 2022 was an un-crewed launch to test the Space Launch System (SLS) and the Orion spacecraft which is capable of carrying six astronauts to the surface of the Moon. Orion will return to Earth on December 11th 2022.

EARTHSHOT

The Earthshot Prize was founded in 2021 in response to the global climate crisis. The mission is to find, and reward, some of the most outstanding people and organisations proposing solutions to specific problems.

The prize is about celebrating the power of human ingenuity to prove that the seemingly impossible is possible.

The prize is awarded on December 2nd 2022 in Boston.

The 2021 Earthshot prize was awarded in Dehli
