

Volcanos

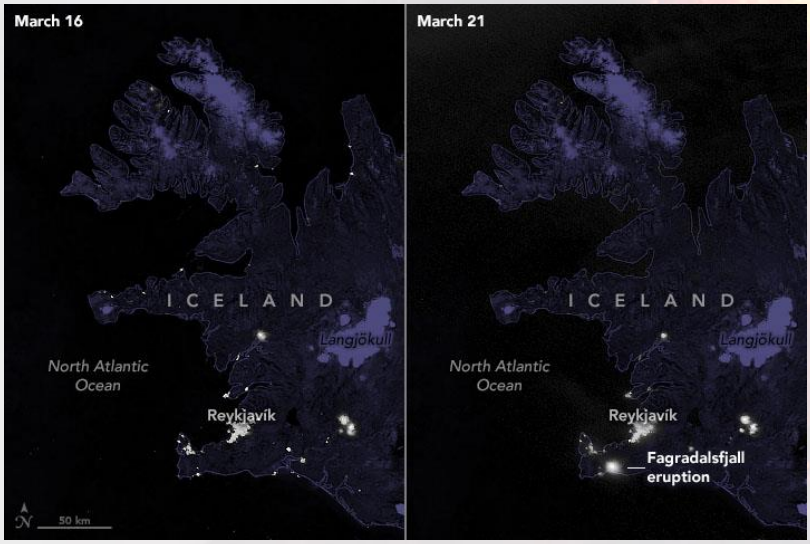

April 2021

On Friday, April 9, La Soufrière, the largest volcano and the highest peak on the main island of St. Vincent and the Grenadines, erupted for the first time in 40 years. Over 16,000 people had to be evacuated and there has been widespread damage from the ash and lava flow.

La Soufrière Eruption Time-lapse Fresh Water Issues

On the evening of March 19th Mount Fagradalsfjall – a volcano on Iceland's Reykjanes peninsula – began to erupt.

The eruption produced a river of lava that could be seen from the capital city of Reykjavik, 30 km away.

Eruption Drone Footage Live feed

Volcanos have helped shape the surface of Earth for billions of years and a volcanic eruption is one of the most violent natural events Earth experiences.

Bur do you know how volcanos really work?
